**BUILDING + HOME IMPROVEMENT****ALISBERG PARKER ARCHITECTURE & INTERIOR DESIGN**

Principals: **SUSAN ALISBERG AND ED PARKER**, alisbergparker.com

At Alisberg Parker our years of experience have given us a great understanding of how people live. We love working with each client, getting to know the unique challenges of their project and creating stunning solutions and refined architecture. While designing homes which fit comfortably into the landscape, Alisberg Parker brings a clean and fresh modern view to classic design.

ARCHITECTURE

Our designs blend the needs of modern lifestyles with a respect for historical precedent. We have extensive experience with new construction and with renovation of existing structures. Our principals and team work closely with every client in order to understand their needs and to assist them in making choices.

INTERIOR DESIGN

It just makes good sense. Who knows better how to design the interior of your space than the architects that had the vision in the first place? There is something smooth and effortless about having us handle the design of your new space; from start to the completely impeccable finish, we listen to and learn about our client's taste and style to create beautiful and welcoming rooms.

CONSTRUCTION MANAGEMENT

We build with a focus on implementing the exacting standards that our designs deserve. By marrying architectural and construction services, we offer our clients better coordination, a single point of accountability, and economies of scale as they implement their projects. Our construction services are limited to projects that we have designed.
